CS Undergraduate at University of Westminster | Aspiring Full-Stack Developer | Java • Python • SQL • Web Development | Git • CI/CD • Cloud

Malabe, Western Province, Sri Lanka

## Summary

I am a computing student who enjoys building practical solutions and continuously learning through hands-on projects. My academic journey and personal exploration in computing have helped me strengthen my problem-solving, analytical thinking, and ability to approach technical challenges with a structured mindset. While being particularly passionate about working on diverse projects, whether it is developing applications, exploring software concepts, or experimenting with new tools, I enjoy the process of turning ideas into working systems. I am always open to learning, collaborating on meaningful projects, and connecting with professionals who are passionate about technology and innovation.
